

FCC, It has come to my attention that a petition has been submitted to you by the National Association of Broadcasters. In this petition (petition 04-160) NAB is wanting you to keep satellite radio providers from broadcasting locally oriented content, like traffic and weather reports. I have found that this service through satellite radio has been very beneficial for my husband and myself (as I'm sure it is for other satellite subscribers). It is one of the many convenient services that satellite has to offer for those of us who use satellite radio in our cars and in our homes. It is a service that we pay for.

I cannot imagine that NAB has any acceptable reason for taking this service away, especially from those who pay directly for the service.

FCC, please do not allow NAB to control what we pay to have. Please do not accept this petition.

Thank you,
Martha Baeza-Garcia
